

Important Notes

On September 16th, Jesus Ruiz (Junior) joined Twin City Foods and became Pasco's Plant Manager.

In October, the teams marked the end of the harvest season with celebration events at each location.

A special thank you to our warehouse and traffic teams for handling the movement of millions of pounds throughout the season!

Washington

Carrots successfully concluded the Washington harvest on October 23 with average yields. The corn harvest wrapped up on October 16, with 92% of the corn grading A or higher. Our pea season concluded July 16, marking an exciting year for us as we invested in new harvesters, solidifying our position as the largest in the region. Additionally, our Ellensburg facility has returned to full-time processing, and the new Ag Center is now ready for occupancy, positioning us for continued success.

Michigan

Green beans were completed at the beginning of October, with average yields and excellent quality. The team showed exceptional resilience and determination throughout the harvest season, facing the extremely challenging weather conditions in Michigan.

Dan Munko's Closing Message:

"I can't be more proud of the work of the entire team for this year's harvest. The weather in both Michigan and Washington created challenging conditions, but the teamwork through Daily Management and the hard work in the field and the processing floor resulted in a harvest that exceeded all our requirements. Additionally, we achieved historic highs in grade level and did not bypass one field.

We took a giant step forward in our capabilities this year with the addition of 24 pea harvesters and a new Ag Center in Pasco. More importantly, the team grew in understanding and capability and is fast becoming the premier harvest operation in our region. I am excited for this coming season as we will take another step into the future. Thank you to the entire harvest, processing and TCF teams on a job well done."

**Enjoy the holiday season,
and we'll see you in 2025!**
